

COP2221 – Intermediate C++ Programming

Module #3 Assignment Two

9 points

Purpose: the purpose of this assignment is to allow you to interact with your classmates and to “meet” each other. In an online class it easy to feel alone and it's challenging to bond with classmates who can help you learn class materials by giving assistance and alternative perspectives.

I waited a few weeks before giving this assignment to give you a chance to get organized for a new semester – it's now time to meet your classmates!

Directions: create a post on the Discussion Board (in Canvas) called “**Module #3 Assignment Two**”. The post **must** include the following information:

1. Name or nick name, if you have one
2. Academic goal (what degree do you want to earn)
3. Employment goal (what career do you want to pursue)
4. Reason for taking this class
5. Describe your experience with computer programming – classes or professional
6. Using your academic experiences as a background - describe your **best suggestion** for being successful in a programming class – especially an online programming class. Be clear and complete – perhaps your suggestion will help a classmate rearrange study habits!
7. **Reply to a minimum of two classmates** – comment about something they have posted

Grading Criteria

- **1 point** for each **complete** answer to each of the above items – complete simply means that you've answered all parts of the question
- **0 points** for an **incomplete** or **missing** answer to each of the above items
